As part of new regulation (34 CFR 6668.6b) institutions are required to disclose information on gainful employment programs for prospective students. The following information should help you be aware of the average loan debt and likelihood of employment after graduation. Our employment data presented here is based on post-graduate surveys and is included with the caveat that our response rate is very low from recent graduates. We believe employment possibility is underestimated in our figures due to this low response rate. PA Center for Health Careers estimates a high demand for PN's across Pennsylvania for the next 5-10 years.

All data is based on our program only - Practical Nursing, US Department of Labor Standard Occupational Code: 29-2061.00. You can find additional information on occupational profiles at the website <http://www.onetonline.org>

The attached table shows data from the classes graduating between September 2008 and March 2010.

Please remember that the equipment fees charged include all books, equipment for clinical, uniforms, comprehensive testing package and licensure application fees. The only other costs for schooling are in your own room, board, medical expenses, transportation and personal expenses. The school provides no housing or board. We try to estimate that cost in the Cost of Attendance estimates. The Cost of attendance estimate for two recent classes follows the table. This information is updated for each class.

Class Number	Graduation Rate	NCLEX Pass Rate	Employment Rate	Tuition	Equipment/Fees	Median Loan Debt
